HEIDELBERG/Amperfiel supports Autobahn GmbH des Bundes in expanding their internal charging infrastructure

- **Scope: Support for Autobahn GmbH des Bundes in the electrification of its service fleet**
- **Solution: Supply of state-of-the-art AC and DC charging infrastructure**

Heidelberger Druckmaschinen AG (HEIDELBERG), through its subsidiary Amperfiel GmbH, and the federal motorway authority Autobahn GmbH des Bundes are working together to expand Autobahn's charging infrastructure for their service fleet in Germany with state-of-the-art AC and DC solutions. The cooperation between Amperfiel and Autobahn GmbH, which was preceded by a procurement procedure, is an important step towards a sustainable transport infrastructure, especially considering the extensive motorway network of over 13,000 km in Germany. With its charging solutions, Amperfiel will contribute to the electrification of service vehicles of the federal motorway company. Within the cooperation, Amperfiel will supply both AC wallboxes with two charge points and DC charging stations.

Amperfiel is evolving into a system supplier and project planner for charging infrastructure

"Being successful in the procurement procedure of the Autobahn GmbH des Bundes is a clear confirmation of our evolution into a solution-oriented system supplier and project planner," says Davide Ghione, CEO of Amperfiel GmbH. "The electrification of our mobility must take place everywhere, not just in highly visible charging parks. This project shows that Amperfiel is able to deliver needs-based charging solutions for the public and commercial sectors," Ghione continues.

Being awarded the contracts for AC and DC charging points underlines Amperfiel's expertise as a relevant provider for commercial and public charging infrastructure.

Press Information

To ensure that customer requirements are met, Amperfied relies on a hardware-agnostic approach and works closely with experienced partners such as the DB Bahnbaugruppe.

Figure: The award of the contracts for AC and DC charging points by the Autobahn GmbH underlines Amperfied's expertise as a relevant provider for commercial and public charging infrastructure.
