

Saphira Ink Duct Foils

HEIDELBERG

Exceptional cost-effectiveness. Consistently even ink transfer from the ink fountain to the roller frame is just one of the outstanding features of ink duct foils from Heidelberg®. Dimensionally stable edges facilitate foil fitting to ensure short makeready times.

Three quality options for top results

Saphira Ink Duct Foil

The standard ink duct foil for conventional process/spot inks and gloss coatings is Saphira® Ink Duct Foil. It boasts impressive quality, secures reliable production, and offers an excellent price-performance ratio.

Saphira Ink Duct Foil LR

The main feature of the low-wear Saphira Ink Duct Foil LR (Long Run) is its excellent durability. This ink duct foil is suitable for a wide range of inks, ensuring reliable processing of conventional, abrasive, UV, and hybrid inks, opaque white, and coatings on smooth and screened ink fountain rollers.

Heidelberg Foil

Heidelberg Foil is suitable for day-to-day use on presses with screened ink fountain rollers such as the Speedmaster® XL 105, XL 145, and XL 162.

Benefits:

- Manufactured to the precise specifications of Heidelberg
- Uniform ink transfer and excellent performance
- Easy fitting thanks to dimensionally stable foil edges
