

Saphira Rollers and Chemistry

HEIDELBERG

A perfect match for optimum print performance

Like all other Saphira®-branded products, Saphira rollers and pressroom chemicals have been tested and approved by Heidelberg® to provide optimum performance. When time comes to exchange your rollers, our goal is to enable you to achieve the same print quality levels as when your press first left the factory. By choosing Saphira rollers and chemistry, you are selecting key consumables which complement each other to achieve the levels of performance and reliability required for your business.

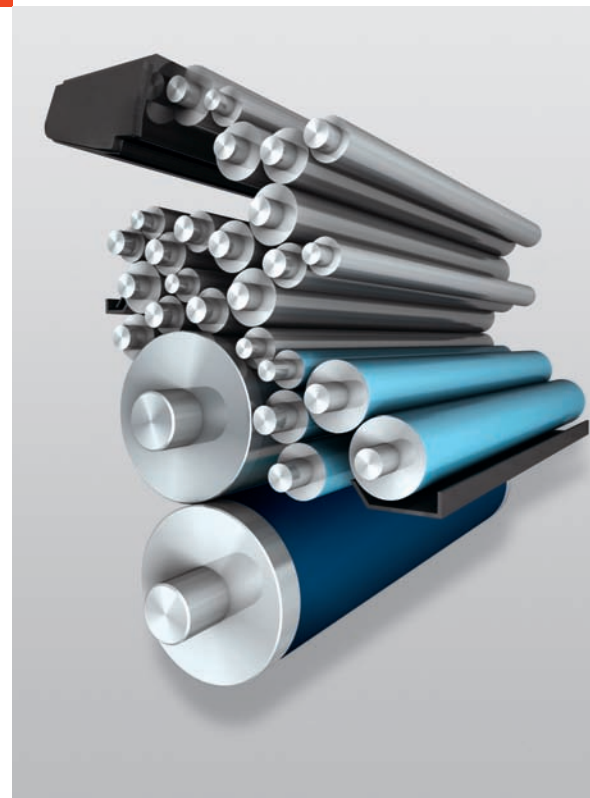

Proven and tested products combined with the expertise of Heidelberg Systemservice. The performance of our Saphira washes and fount solutions has been tested to industry standards to secure optimum washing and print performance, while at the same time ensuring the longevity of the rubber on your rollers. Heidelberg also offers you access to its renowned Systemservice® team, who offers a number of added-value options to complement the Saphira portfolio:

- Removal and installation of rollers to the latest Heidelberg specifications
- Adjustment of rollers and print tests using Heidelberg approved test jobs as well as customer's inks and papers
- Overall inspection and Fitness Check of the printing unit

By taking advantage of our expertise, you can:

- Increase your productivity by raising print quality and performance
- Plan ahead to minimize the risk of unforeseen breakdowns or technical problems related to your rollers
- Relieve your employees of the time-consuming and exacting process of optimum roller adjustment
- Ensure constant top quality and performance levels of your printing presses in the long term
