

Saphira Wash-up & Go

HEIDELBERG

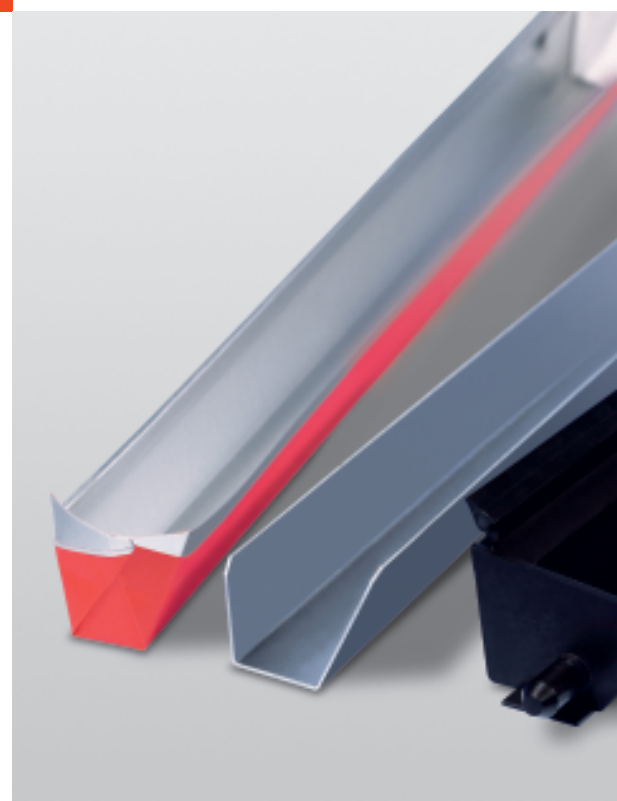

Efficient cleaning. With Saphira® Wash-up & Go, Heidelberg® offers an innovative and cost-effective cleaning system for your printing equipment. Based on a system of aluminum tray and disposable liners, Saphira Wash-up & Go enables you to clean your machines quickly and efficiently. You no longer need to painstakingly scrub colors after each printing job: Simply remove and dispose of the used liner, then install a clean one within your tray.

Cost-effective and environmentally-friendly. By reducing the time needed to clean your machines, Saphira Wash-up & Go enables you to reduce downtime and increase your productivity. Because it eliminates the need to use chemical solvents, Saphira Wash-up & Go also contributes to preserving the environment and improves the quality of your working environment.

Measurable time-savings. Saphira Wash-up & Go ensures significant benefits in terms of time-savings, even for single color presses. The more units a machine has, the more profitable the system proves to be. For instance: On five-color presses, Saphira Wash-up & Go enables time-savings of up to 30 minutes.

Benefits:

- Increases your productivity by dramatically shortening the time needed for cleaning
- Preserves your equipment and the environment
- Reduces waste-disposal; no solvents needed
- Proven benefits for single-color-machines
- Cuts the cleaning process by up to 30 minutes

Trademarks

Heidelberg, the Heidelberg logotype, Printmaster GT0, Saphira, and Speedmaster are registered trademarks of Heidelberger Druckmaschinen AG in the U.S. and other countries. All other trademarks are property of their respective owners.

Subject to technical modifications and other changes.

Saphira Wash-up & Go

Two versions available. Saphira Wash-up & Go is available in two different versions depending on the press's model and type: with retaining groove or magnetic strip. Thanks to the new magnetic strip system, replacing used liners is easier than ever: The liner needs only be gently pushed against the tray to be magnetically secured.

Where to buy Saphira consumables?

Saphira consumables from Heidelberg are available for the pressroom, prepress, and postpress – at reasonable prices. We supply Saphira products quickly and reliably. Over 250 international sales offices provide for all your needs. In many countries, you can even place orders 24/7 through our online shop at www.heidelberg.com/shop.

Technical Specifications

| | Wash-up & Go System with retaining groove | Wash-up & Go System with magnetic strip |
|-------------------------|---|--|
| Components ¹ | Aluminium support Liner ² Wash-up blade | Aluminium support Liner ² |

¹ Starter Kits including one aluminum support and two liners are available. For systems using retaining grooves, a wash-up blade must be separately ordered.

² One pack liner includes 25 pieces.

How to use Saphira Wash-up & Go in three short steps

Step 1

Remove the complete wash-up tray from the press unit. Dislodge the used liner from the aluminum tray.

Step 2

Dispose of the old liner, in compliance with your company's rules and regulations.

Step 3

Place the aluminum tray and a new liner into the wash-up tray. Secure the liner using the locking strip or magnetic strip into the wash-up blade.
