

Saphira Starter Kit Commercial Standard

HEIDELBERG

Products you can trust. The consumables in the “Saphira® Starter Kit Commercial Standard” have been specially developed for press commissioning/acceptance inspections, Print Color Management measures and/or certifications to ISO 12647-2. They also deliver exceptional print performance.

Consistent properties. The metrological evaluation of printing properties such as dot gain, ghosting, ink fading, slurring, and doubling can occasionally be influenced by the materials being used. When technical print problems occur, it is often difficult for the printer to identify the source of these problems. In such cases, it is essential to have access to consistent materials, i.e. materials that deliver defined printing values and/or properties and can be discounted as the cause of any print problems.

Working in harmony. The products in the “Saphira Starter Kit Commercial Standard” are perfectly matched and therefore the ideal choice for high-quality sheetfed offset printing on presses from Heidelberg®. They are manufactured exclusively for Heidelberg in accordance with special quality standards and can only be obtained through the Heidelberg sales and service organization.

Benefits:

- Standardized test printing and press startup
- Achieving bvdM/FOGRA requirements in press acceptance inspections
- Basis for Print Color Management (PCM) measures and/or certifications to ISO 12647-2
- Standardized and uniform material quality

Saphira Starter Kit Commercial Standard

	Product	Performance
Ink*	Saphira Ink C Standard 100	Sheetfed offset inks of the highest quality for four-color printing. Saphira inks enable compliance with both ISO 2846:1 and ISO 12647:2.
Blanket*	Saphira Blanket Pro 200	Extensively tested and approved by Heidelberg. Produced exclusively for Heidelberg, it boasts an extremely wide range of applications and is ideal for ISO certifications and PSO standardizations.
Dampening solution additive*	Saphira Fount C Standard 100	Allround dampening solution additive for the majority of conventional dampening unit systems. Recommended IPA admixture: 8–10%.

* Ink, blanket, and dampening solution additive are selected to suit the relevant press configuration.

The New Peace of Mind. The combination of Saphira consumables, Heidelberg know-how, and your own expertise brings stability to production. This means you can relax.

Proven quality. Saphira® consumables are thoroughly tested by our experts to make sure they are perfectly attuned to each other and to your production systems.

Expert advice. Our experts will help you select your consumables and answer any technical queries you may have.

Everything from a single source. We are your one-stop shop for consumables, machines, software, and services. This makes life easier and simplifies administration.

Saphira consumables from Heidelberg® are available for the pressroom, prepress, and postpress – at reasonable prices.

Whatever your location, Saphira consumables from Heidelberg are delivered quickly and reliably. They are easy to order from our 250 sales offices around the globe. In many countries, you can even place orders 24/7 through our Online Shop at www.heidelberg.com/shop.
