

Fast cleaning of ink fountain and rollers with the Heidelberg concept

Assumption cleaning time:

Other systems in market: 6 min

- Without or with shorter ink foil
- Without changeable ink fountain cheeks (poor cleaning, longer maintenance, calibration of ink keys necessary)

Heidelberg ink fountain: 1 min

- Precise and very fine ink zone adjustment and fast reaction
- Ink foil covers the critical area between ink and metering cylinder and prevents drying of ink at critical points
- Changeable ink fountain cheeks reduce makeready times
