

# Just 2 cl washing fluid

- Cloth washup device for the blanket and the impression cylinder
- One wash cycle with a brush system needs 150 ml washing fluid. The cloth wash up device needs only 2 cl.
- 90 % washing fluid are saved per washing cycle and washup device.
- The benefits are: cost saving of the washing fluid, elimination of the collection and disposal of a larger quantity of washing fluid.
- The used cloths are simple to dispose under environmental aspects.
