

Select and release jobs for printing with just 2 clicks

- With the new job preparation on the Wallscreen XL of the Prinect Press Center XL 2, all information about the job is displayed at a glance
- By transferring the setup process from the touchscreen to the Wallscreen XL, Intellistart 2 enables you to view the job list and job preparation in a single display
- You can select jobs from the job list on the left, while on the right you can review the detailed job information and adapt it if necessary
- The better the workflow integration, the more data gets to the press
- With complete Prinect integration, you can select a job, review all the job data at a glance, then select and release a job straight away with just 2 clicks

New and unique assistance system with Intellistart 2
Intellistart vs. Intellistart 2 – What's the difference?
