

## Prepare up to 30 jobs in under 3 minutes on the fly and then process them in a fully automated workflow.

- For production, Intellistart 2 stores released jobs in the new Job Queue until the current job is completed.
- For the first time, up to 30 jobs can be prepared and released on the fly and these jobs then stored in the order defined by the printer.
- Maximum flexibility for the printer.
- The printer can save time and make good use of long production times by preparing several jobs.
- With the new Prinect Press Center XL 2 and the Prinect workflow, your press will achieve a new level of productivity.
- The new Job Queue enables online print shops to prepare up to 30 jobs in under 3 minutes on the fly and then process them in a fully automated workflow.
