

Your way to success.
**Business Consulting –
Make ready workshop.**

Procedure of a Make ready workshop

Make full use of the potential of your print shop when setting it up. Optimize your set-up processes and improve your productivity as well as your profitability in the long term.

The trend towards shorter runs and tight delivery times is putting production under pressure. Efficient set-up processes that reduce costs and help to make better use of existing capacities are important.

Expected results:

- Analysis of the key figures
- Common understanding of goals (managers and employees)
- Qualification of printer
- Define potential and develop solutions with the employees
- Standardize the set-up process
- Ensure sustainability through training

Ø Reduction of set-up times between 10 % – 50 % machine-related.

The large number of successfully completed projects and references is convincing. Contact us and learn more about our methods. We are looking forward hearing from you.
