User profile:

Speedmaster XL 75-5-P+L

Commercial print shop

- print runs are between 18,000 and 30,000 sheets
- production speed, depending on the print runs are between 13,000 and 15,000 sph

„In approx. 4 minutes from the last good sheet of the previous job to the first good sheet of the new job including blanket washing. The new XL 75 is extremely fast, flexible and the jobs are produced as priced. Our old XL 75 from 2008 was – with some experiences – unrivalled.

The new Speedmaster XL 75 with the drupa 2016 innovations are a real game changer.“
