

Customer Naber & Rogge, Germany

Customer profile:

Speedmaster XL 75-5-P+L

Commercial print shop

- print runs are between 18,000 and 30,000 sheets
- production speed, depending on the print runs are between 13,000 and 15,000 sph

„Especially with small print runs and frequent job- and substrate changes we benefit from the new feeder. Together with Prinect Inpress Control 2 it pays off particularly in conjunction with the trip-free start up when we change the material. All jobs can be printed with the material the customers request. In the past we had trips when we printed on critical or lower-quality paper. With the new feeder we print them much more stable and 1,500 to 2,000 sheets per hour faster.“
