

Pressroom Consumables.

Wash up Cloth 200.

Description

All wash-up cloth rolls marketed under the Saphira brand name have been tested and approved by the Research and Development department of Heidelberger Druckmaschinen AG.

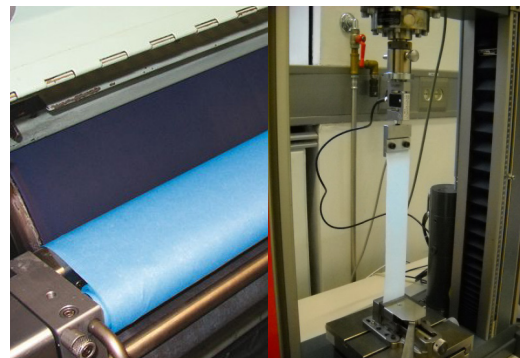

The Heidelberg wash-up programs on all printing presses have been specifically geared to these approved wash-up cloths to ensure all Saphira Wash-up Cloth with its unique fabric characteristics and monitored high product quality deliver optimum washing results and reliable print production.

Area of application

- The Saphira fabric qualities have been approved for all Heidelberg press models.
- All approved cloth supply rolls are suitable for use on both conventional and UV presses.

Benefits

- Time and cost savings compared to manual wash cycles.
- Reduces consumption of wash solution due to perfect match of Saphira Wash, Saphira Wash-up Cloth and Heidelberg wash program.
- All cloth supply rolls have been thoroughly tested and approved by the Heidelberg development department.
- The functional characteristics are geared to reliable operation and a high level of performance in our wash-up devices.
- Precise manufacture and quality assurance in terms of roll diameter, width, and tension (fixed production tolerances).
- Superb cloth's tear resistance and mechanical stability
- Limited swelling combined with good absorbency.

Saphira Wash-up Cloth Classic 200 is a more economical alternative to the standard **Saphira Wash-up Cloth 200**.
