

# ISO 12647-2 Certification

Choose Heidelberg for a 360 degree service, from consulting to implementation and certification. In an increasingly competitive market, a clear commitment to consistent print quality is one of the key differentiators that will enable a company to win new opportunities and retain customers. By attaining the ISO 12647-2 certification, you are able to provide evidence to your customers and prospects that your business has achieved the highest standards in terms of color integrity and repeatability.

Heidelberg offers a certification process that meets the requirements of the current ISO 12647-2 standard. This standard applies to print and proof processes with the colors Black, Cyan, Magenta and Yellow (BCMY) for sheetfed offset printing. More than 70 print shops around the world have already been certified to ISO 12647-2 standard by Heidelberg. We have the expertise and capability in providing a full comprehensive package from consultancy, prepress adjustments and press modifications, to inspection, certification, documentation and training.

## Why choose Heidelberg?

- ❖ **Full Service** – We are the only ISO 12647-2 registrar to deliver a turnkey service for Heidelberg equipment - from consulting and prepress and press adjustment to testing and certification. Documentation and training are also included.
- ❖ **Expertise** – Our team of SystemService specialists have years of color management experiences. They understand how to fully exploit the capabilities of your prepress and press equipment to ensure you unlock the true potential in your print shop.
- ❖ **Cost-effectiveness** – Unlike many other ISO certification service providers, we do not require any additional software or consumables to achieve the standard.
