

Digital freedom.
Versafire LP.

All-round productive. More than digital printing.

Versafire LP from HEIDELBERG – your reliable partner in the production mix.

Meeting the current market trends and customer requirements with our new, highly productive, digital printing press for small and large print runs in the commercial sector. The powerful Versafire LP stands for the best quality, large print volumes and a wide variety of materials.

As a digital all-rounder, Versafire® LP with automatic color measurement and inline register ensures more safety and efficiency in your production. Output switching between offset and digital printing, including color adjustments, can be done in seconds, even at the last minute. You can respond to customer needs at any time.

Benefit from the numerous advantages of digitalization: In the pressroom, it simplifies the control and operation of the machines. On a commercial level, it offers insights into the productivity of the digital printing press at all times.

When you choose HEIDELBERG®, you buy more than just a digital printing press. You get access to an ecosystem that offers real added value – with service, consumables, digital services, software, cloud-based solutions, training and advice. We accompany you into the future.

Designed for perfection. **Versafire LP.**

Versafire LP sets standards in terms of productivity and quality. It is ideal for different pressruns and for variable data printing.

Experience maximum diversity – in everyday production as well as in machine equipment. The modular Versafire LP can be converted at any time in terms of speed and the desired feeders and finishers on site to meet changing requirements.

Designed for wow effects. Inside the Versafire LP, an active perfecting register scanner in conjunction with continuous calibration and integrated sheet cooling ensure reproducible quality. Optionally, each individual sheet can be compared with the corrugated PDF data and automatically rejected if there are any deviations. The result: always a perfect pile

Integrated postpress opens up new possibilities, including on-demand production in print run one. A sorted output of jobs saves time in finishing and reduces delivery times. With Versafire LP, you expand your offering. If requested, brochures trimmed on three sides with a straight spine, posters up to 1,260 millimeters long, and six- or eight-page banners including duplex creasing can be produced.

Productivity begins with the intuitive operation of the Versafire LP. You can set up new media quickly and easily on the 21.5-inch touch-screen monitor. For direct help with questions, online help and special videos are available around the clock, supplemented by training on site or in our international training centers. For best performance from day one.

Simply different. Prinect Digital Frontend.

Intelligent automation makes working easy and intuitive. That's why we developed the Prinect Digital Frontend for the Versafire – as a smart control center for short production times, quick job changes and personalization.

Easy, fast and cost-effective.

The Prinect® Digital Frontend supports the standardized Production without compromise. Whether order creation, preflight check, color management or imposition, all steps can be automated.

Transparent production – developed for the graphic industry.

Automation

It's that easy

The Prinect Digital Frontend simplifies your prepress tasks through highly automated, smart production. Prepress sequences reduce touchpoints as well as time and costs per job.

Ease of use

See what's coming (WYSIWYG)

The clear user interface, including a live preview of the print job, makes job preparation intuitive and quick. In conjunction with functions such as standardized sequences, time savings in prepress are possible.

Color management

Knowing how

The know-how of HEIDELBERG in creating media-specific profiles and color management forms the basis for impressive printing results. In addition, the Prinect DFE offers you the easy option of adjusting and simulating special colors.

Integration

Independently or in offset workflow

The Prinect Digital Frontend can be operated independently or integrated into the Prinect Production Workflow. This means you can produce jobs either digitally or in offset from a workflow.

Use the advantages of digital integration at HEIDELBERG – maximum flexibility, output security, and fast processing under a common user interface.

VERSAFIRE L

Banner printing up to 1,260 mm printed on one side or 1,030 mm printed on both sides. Suitable for the production of six to eight-pagers as well as large posters on one sheet.

Quality proof using automatic inline PDF-based color matching and correction as well as defect detection provides security and reduces manual effort.

Intuitive color management with media-specific ICC profile creation ensures easy color adjustment to offset.

P

Twin Toner Bay with two cartridges per color allows toner replacement in non-stop operation for consistently high productivity.

Interposer introduces pre-produced sheets into the pile during ongoing print production – for seamless inline postpress.

Two large **vacuum feed trays (Vacuum Feed LCT)** with optimized sheet control for lateral stabilization of the pile during feeding.

8

Inline finishing

High added value, because printing and postpress take place in one go.

Continuous production with new postpress options increases the diversity of the offering and shortens production and delivery times.

6

New basic computer

Intuitive operation on the 21.5" touchscreen monitor with browser-based user interface and media recognition unit.

9

Supported paper transport

Reliable processing of grammages from 40 to 470 g/m² thanks to the large transport radius.

7

Integrated Quality Proof

Automatic quality control in the ACD (Auto Color Diagnosis) unit.

Color deviations are automatically detected and corrected through real-time measurement of each individual sheet after printing in the **Image Quality Monitor**.

Defects such as artifacts on the sheet can be detected by **comparison with the PDF data** and the sheets can be rejected if necessary.

4

High quality CMYK printing

With **two toner cartridges per color** in the **twin toner bay**, non-stop production can be carried out in CMYK.

This enables cartridges to be changed during operation, an essential requirement for autonomous production.

2

Large feed station trays

Sufficient space for the **printing material**, suitable for, e.g., 2,500 sheets each at 80 g/m² grammage.

They can be refilled independently during production and increase the **production capacity** during autonomous production.

1

Separate banner trays

Additional material trays provide **space for large formats** such as banners up to 960 mm long.

5

Fuser Technology

The fuser fixes the applied toner onto the sheet at up to 200 °C, depending on the material thickness.

Depending on the motif, **the gloss level** can be adjusted individually.

3

Automatic alignment

The paper alignment is essential for accurate, **high-quality perfecting**.

The **Swing and Shift technology** ensures this register accuracy right up to the banner format.

In the feeding tray, **sensors and air support** prevent the infeed of double sheets.

Vacuum suctiontapes ensure safe processing of **a wide variety of printing materials**.

Knowing how.

Versafire Production Training.

Expertise is the key to reliable production. Our Versafire Production Training explains media setup and practical handling during production. So that working with Versafire LP is always a breeze.

Quickly and safely. The media database for the best results.

A standard media library is built into every Versafire. However, there are thousands of printing materials that you can print jobs on. The Versafire Production Training (Professional Level) explains how to optimally set machine parameters for different materials.

It's so easy to become an application and media professional:

Overcoming challenges

Professional-level training

Our professional-level training shows you how to make optimal use of the Versafire's capabilities. It is aimed directly at the operators and is ideally carried out after the first four to twelve weeks of experience with the Versafire.

Learn on-site from our experienced experts how to adjust media to maximize print quality. Benefit from many tips and tricks that will make your daily work easier.

Suitable for your needs

Individual media management

The right media setup simplifies the production challenges. It's easy with the Versafire's wizard-driven user interface, which drastically reduces the time and effort required for media setup. All settings can be saved, exported, imported and assigned to a paper tray so that no media settings are lost. In the event of a malfunction, our experts will check the submitted settings.

Simply perfectly prepared. Prinect PDF Toolbox.

The Prinect PDF Toolbox significantly simplifies your daily work with PDFs from a wide variety of sources. Optimize your production process with a variety of powerful tools to edit PDF files effortlessly.

PDF Assistant PLUS Suite

A kit with extensive tools, tailored to the specific requirements of digital printing.

PDF Assistant

Powerful tools for checking and correcting PDF documents for error-free print production with preflight, PDF VT control, page assembly, definition of page geometry and register as well as PDF comparison function.

Coating Editor

Automatic creation of special color layers in PDF documents.

Object Editor

Display and processing of objects or objects parameters in PDF documents.

Document Assembly

Offline compilation of PDFs into complete jobs including media and register adjustments.

Page Assembly & Barcode & VDP Editor

Creation of variable identification and production barcodes (EAC/UPC/Data Matrix) directly in the PDF document as well as creation of simple variable PDF/VT documents.

A man with a beard and mustache, wearing a light blue striped shirt and dark trousers, leans against a large Heidelberg Versafire printer. He is smiling and looking towards the camera. The printer is dark grey with the Heidelberg logo and '[gida] Graphic Arts Edition' visible. A computer monitor is visible in the background on the left.

“ It is incredibly convenient to be able to respond so easily and quickly to our customers’ needs. Because thanks to Versafire, we can afford to deliver a few copies in a short time at reasonable prices.

Riccardo Gianetti
Managing Director

Everything you need in one place. The HEIDELBERG ecosystem.

Remote Services

Enjoy the benefits of fast and remote problem solving, maintenance and analysis of machine performance.

On-site services

From technical service to 24/7 parts delivery you can always rely on the largest service network in the industry.

Prinect Business

Automate your commercial processes and see where you make or lose money.

Prinect Production

Make your print processes perfectly seamless with volume-based pricing.

End-to-end production workflow

Increase productivity with speed, quality, digital integration, and reliability.

Every print shop is different, and every customer has unique, comprehensive needs. That is why we have developed our offerings to serve these needs all across the spectrum. What makes us

unique is that you can find everything here that makes your print shop smarter, faster, and better. Make HEIDELBERG your one-stop shop for everything that contributes to your success.

The digital customer portal

Reach cloud-based production, shopping, support, reporting, and administration services from anywhere, at anytime.

Sustainable production

Go carbon-neutral and reduce waste and energy consumption with our sustainable solutions.

Saphira® Consumables

Use proven and tested consumables optimized for your HEIDELBERG equipment, including an eco-friendly product line.

The right investment

HEIDELBERG machines have a high resale value. If you invest in it today, it will pay off in the future.

Print Media Center Network

Print Site Contracts.

Three contract packages,
as individual as your
requirements.

You benefit from a combination of the best Heidelberg products you need to operate your machines profitably.

Choose what suits you best:

Our Print Site Contracts service contracts are scalable to your needs. The lifecycle packages contain everything required for stable printing operations and are billed monthly according to the scope of services and consumption. Subscription packages also include the benefits of a comprehensive and optimized print production system. In this case, payment is based on a fixed agreed print volume.

In both cases, you will reduce your process costs and gain more time for your customers.

Have we piqued your interest? Let us work together to create an individual solution package that meets your needs.
