

Maintenance Manager. **A cloud-based solution.**

Maintenance redefined. Entering into a digital world.

Replace paper-based maintenance with our cloud-based Maintenance Manager software for a transparent maintenance process. Access information via web and mobile device and digitally organize your maintenance tasks.

Adapting to the future of digitization

The print media industry has significantly evolved over the last few years. More and more presses are running 24/7 with shorter run lengths, which means more make readies and higher throughput. This makes the demands of your customers higher than ever before. It is time for you to adapt to these new market requirements within a digital world to stay successful and profitable.

A revolution in maintenance management

The Maintenance Manager is a software system for digital maintenance management of your press. This allows you to replace paper-based maintenance with Maintenance Manager's cloud-based web and mobile phone app for transparent and practical maintenance upkeep.

Maintenance Manager provides all machine-specific maintenance activities and their due dates allowing for effective maintenance task planning, execution, and documentation matching the individual press configuration at any time. All tasks are supplemented with further information and task descriptions including training videos. The special feature – the integrated log function, makes it possible to check off each completed maintenance step. You can also upload and save any necessary images and comments centrally in the Maintenance Manager.

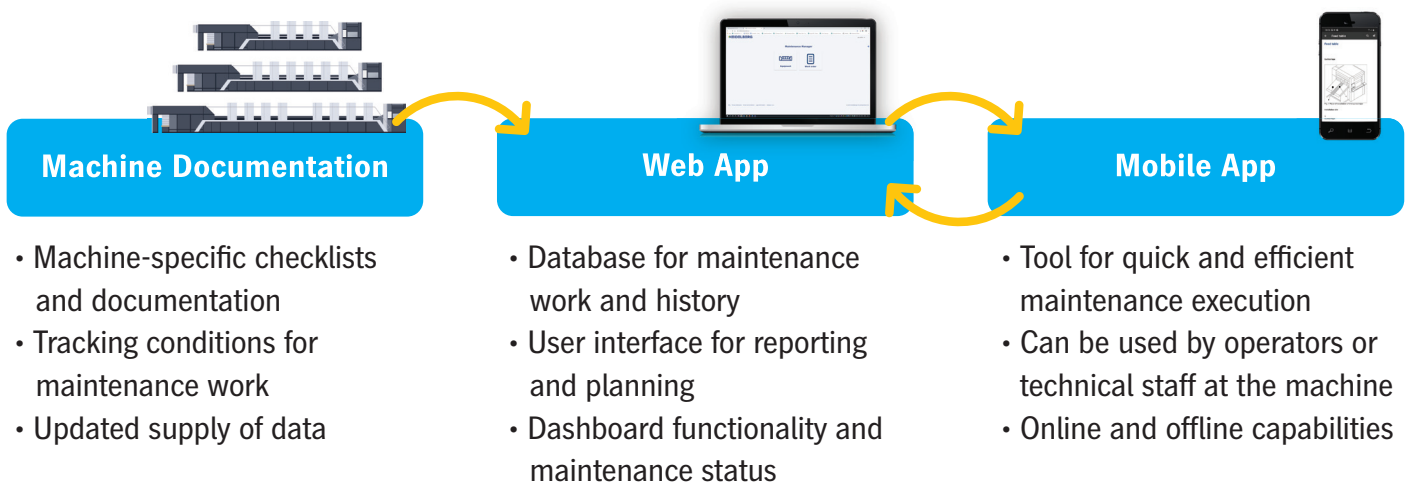

Requirements for Maintenance Manager

For full use of the Maintenance Manager, a computer with a web browser in its latest version and an Android mobile device are both required for the applications. The license includes access for up to six users.

Easy access with Heidelberg Assistant

Maintenance Manager is available as an additional service of Heidelberg Assistant on a contract basis in combination with our Print Site Contracts.

Heidelberg Assistant provides an overview of key performance indicators, service contracts, and services that can be viewed to keep an eye on machine availability and efficiency. At the same time, it is the central point of access to many other Heidelberg® services for online communication or transferring information for technical clarification quickly. Access to Heidelberg Assistant is easy via PC, tablet, or smartphone.

Maximize machine availability.

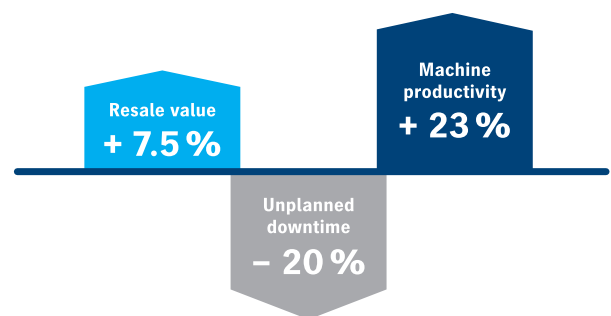

9 clear benefits for you.

With Maintenance Manager, all members of your maintenance team have access via PC, tablet, or smartphone to the exact information they need in order to maximize machine availability with minimum effort.

- 1 Savings of 1-2 service interventions per year through professional and digitalized maintenance activities and improved prioritization
- 2 15-20% lower maintenance effort through process efficiencies and clear instructions
- 3 Better press performance due to less waste and higher print speed
- 4 Keep control of all maintenance activities in a digitized manner
- 5 Smart and modern maintenance management geared to your specific press with easy access via Heidelberg Assistant
- 6 Use Maintenance Manager as the first step for further networking and process integration
- 7 Profit through transparency even from the maintenance management by top performers
- 8 Maximized machine availability and uptime with minimal effort
- 9 Receive professional documentation for audits and analysis as required by your customers

**A seamless
end-to-end
workflow.**

Liability for contents

The contents of this brochure have been prepared with great care. No warranty or liability is accepted for the correctness, completeness, or accuracy of the information. There is no guarantee or warranty that the customer will be able to achieve the values and numbers (e.g. relating to the function and performance of the machine and the software) specified in the brochure. The information provided is based on ideal conditions and proper use of the machine and the software. Achieving these values and numbers depends on a variety of factors and circumstances that are outside the control of Heidelberg (e.g. machine settings, technical conditions, ambient conditions, raw materials and supplies used, consumables used, standard of care and maintenance of the machine, expertise of the operator, meeting the respective system requirements, etc.).
