

Your way to success.  
**Performance Consulting –  
Makeready Workshop.**

---

Procedure of a makeready workshop

The trend towards shorter runs and tight delivery times is putting production under pressure. Efficient set-up processes that reduce costs and help to make better use of existing capacities are important.

Maximize the potential of your print shop when setting it up by optimizing your set-up processes. This results in improved productivity as well as profitability in the long term.

**Expected results:**

- Analysis of the key figures
- Common understanding of goals (managers and employees)
- Ensure sustainability through training
- Define potential and develop solutions with the employees
- Standardize the set-up process

**Reduce average makeready time between 10%–50% based on machine.**

The large number of completed projects and references has been successful across many areas of the printing industry. Contact us and learn more about our solutions. We look forward to hearing from you.
