

# Print Media Performance & Training Center. Advanced Digital Printing.

## Overview

This class is suitable for any operators looking to advance their current digital print know-how and work hands-on with our digital print engines. This class will go over advanced topics on most Versafire® digital presses.

## Introduction

To get the most out of the Versafire, operators should be familiar with their RIP as well as media settings on the printer. Participants in this course will be trained how to tailor preflighting and color management to their specific type of work. They will also learn the proper use of the Advanced Paper Settings library, creation of new media, and how to troubleshoot common paper running issues using “J” error codes.

## Topics

- Proper machine warm-up procedure
- Creation and optimization of new media
- Optimum sheet registration and orientation
- Optimization of toner transfer and the fuser
- Optimization of the paper feed in the LCT
- File optimization for faster RIP-ing
- Creating the best conditions for color management
- Variable data printing
- Printing synthetics and special substrates

## Trademarks

Heidelberg, the Heidelberg logotype, and Versafire are registered trademarks of Heidelberger Druckmaschinen AG in the U.S. and other countries. All other trademarks are property of their respective owners.
